April 2016 – March 2018. Unitary enterprise «Perfume and cosmetic factory «Sonca», position – Lawyer.

### EDUCATION

2011 – 2016. The Academy of Public Administration, qualification – lawyer.

### ABOUT ME

When I used to work for «Intelligent Urban Systems» as a lawyer, I got in touch with their developers. These guys inspired me with their extraordinary way of thinking, their methods to discuss, think about the tasks and solve them. Full of enthusiasm, I started to take an interest in programming and decided to take Java courses at the BelHard Academy. Constantly delving into the study of Java, as well as related technologies (Spring Boot, SQL, HTML and others), I finally decided to change my profession and do programming only. No matter how difficult my path will be.

I got interested in your internship because I see this as a great opportunity to cooperate with the professionals and upgrade my skills.

Thanks for your time. Will be waiting for the feedback.
